Brainstorming & Idea Prioritization Template

Date	30 September 2026
Team ID	6ab3ec14b5170a9b58b3a658
Project Name	Implement Client Script and UI Policy
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Vaitheeswari A	Use Client Script to validate form fields on the client side	Client Validation	1
2	Atchaya Dharani J	Use UI Policy to make fields mandatory, visible or read-only based on conditions	UI Policy	1
3	Keerthana S	Display messages and prevent invalid data before form submission	User Experience	2
4	Vaitheeswari A	Auto-populate or change field values based on user input	Form Automation	2
5	Atchaya Dharani J	Use conditions to show or hide fields dynamically	Dynamic Form	3
6	Keerthana S	Test Client Scripts and UI Policies with different form conditions	Testing	3

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)	Reason
1	Implement Client Script for client-side field validation	High	High	1	Yes	Improves data accuracy and gives immediate validation to the user.

2	Implement UI Policy for dynamic field visibility, mandatory and read-only settings	High	High	2	Yes	Makes the form easier to use and automatically controls fields based on conditions.
3	Integrate and test Client Script and UI Policy together	Medium	High	3	Yes	Ensures both features work correctly under different form conditions.

Final Selected Project Idea: Implement Client Script and UI Policy in ServiceNow to validate user input, control field visibility and mandatory/read-only states, and improve the overall form user experience.
