Project Name	Implement Client Script and UI Policy
Maximum Marks	2 Marks

Customer Journey Map

Map out the customer's experience step-by-step, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1	Stage 2	Stage 3
Actions **What does the customer do?**	• Open the ServiceNow form. • Enter or review required information. • Select or update form fields.	• Interact with fields based on the form rules. • Observe fields becoming visible, hidden, mandatory, or read-only. • Correct or complete information as guided.	• Submit or update the record. • Review the final form values. • Complete the task successfully.
Touchpoint **What part of the service do they interact with?**	• ServiceNow login. • ServiceNow application/form. • Form fields and controls.	• Client Script responses. • UI Policy behaviour. • Messages and field states.	• Save/Update button. • Updated ServiceNow record. • Confirmation of successful completion.
Customer Thought **What is the customer thinking?**	• “Where should I enter the information?” • “Which fields are required?” • “I hope the form is easy to use.”	• “The form is responding to my selection.” • “I can see only the fields I need.” • “The rules are helping me complete the form.”	• “My information is correct.” • “The task is completed.” • “The process is simple and clear.”
Customer Feeling **What is the customer feeling?**	• Curious • Slightly unsure • Ready to complete the form.	• Confident • Guided • Less frustrated.	• Satisfied • Relieved • Confident that the record is updated.

Process Ownership Who is in the lead on this?	• ServiceNow Administrator • Project Team • Application/Process Owner	• ServiceNow Administrator • Developer/Project Team • Application/Process Owner	• ServiceNow User/Agent • Application/Process Owner • Project Team
Opportunities How can we improve this stage?	• Provide clear field labels and instructions. • Keep the form simple. • Identify required fields clearly.	• Use Client Scripts only where needed. • Apply UI Policies consistently. • Show useful messages and avoid unnecessary fields.	• Validate the form before submission. • Reduce manual data entry. • Collect user feedback for future improvements.

Project Focus: Improve the ServiceNow user experience by using Client Scripts and UI Policies to control form behaviour, guide users, and reduce unnecessary manual work.
