Project Demo Planning

Date	30 September 2026
Team ID	6ab3ec14b5170a9b58b3a658
Project Name	Implement Client Script and UI Policy
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Introduce the project and the need to control and validate Incident form behavior in ServiceNow.	1	Member 1
2	Solution Overview	Explain the architecture and the difference between UI Policies and Client Scripts (onLoad, onChange, onSubmit).	1	Member 1
3	UI Policy Demo	Show Category = Hardware making Configuration item mandatory, and Urgency = 1 - High making Description mandatory, including automatic reversal.	2	Member 2
4	Client Script Demo	Show the onLoad guidance message on a new incident and the onChange message beside Urgency.	2	Member 3
5	Validation & Testing	Submit a Short description under 10 characters to show onSubmit blocking the save, then save a valid record; walk through the test cases.	2	Member 3
6	Conclusion & Q&A	Summarize the outcomes, pending items and answer questions.	2	All Members

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Explain why incident forms need mandatory-field rules and input validation.
2	Solution Overview	Show the UI Policy and Client Script records in the ServiceNow PDI and how they relate to the Incident table.
3	Live Feature Demonstration	Open Incident > Create New and demo the UI Policies, then the onLoad, onChange and onSubmit scripts.
4	Q&A Session	Answer questions; mention pending items such as GlideAjax lookups and optional UI Policy scripts.
